

A light, flexible, washable and resistant shoe, derived from the manufacturing system using direct injection. There is no stitching or gluing between the upper and sole: the shoe is made in one piece. With a non-slip sole and unisex upper, it provides support for the foot without compression. The raised instep allows the weight of the body to be distributed evenly. The upper is perforated to improve transpiration. A Velcro strap run through a ring helps to adjust the shoe firmly to the wearer's foot.

| Component | Material | Properties and benefits |
|-----------|-----------------------------------|---|
| 1 upper | Onmicro | <ul style="list-style-type: none"> • Breathable • Waterproof • Washable • Does not age or split, and highly resistant to tearing and chemical products |
| 2 insole | Microfibre over polyurethane foam | <ul style="list-style-type: none"> • Includes Thermy-tex treatment (anti-bacteria) • Absorbs humidity • Comfort |
| 3 midsole | Raffia-type fabric | <ul style="list-style-type: none"> • Anti-static |
| 4 sole | Single density polyurethane | <ul style="list-style-type: none"> • Lightness • Flexibility • Non-slip • Impact absorption • Ensures well-balanced support for the sole of the foot • Resistant to hydrocarbons • Insulates against heat and cold |
